

HEALING SYSTEM OF HOLON 29

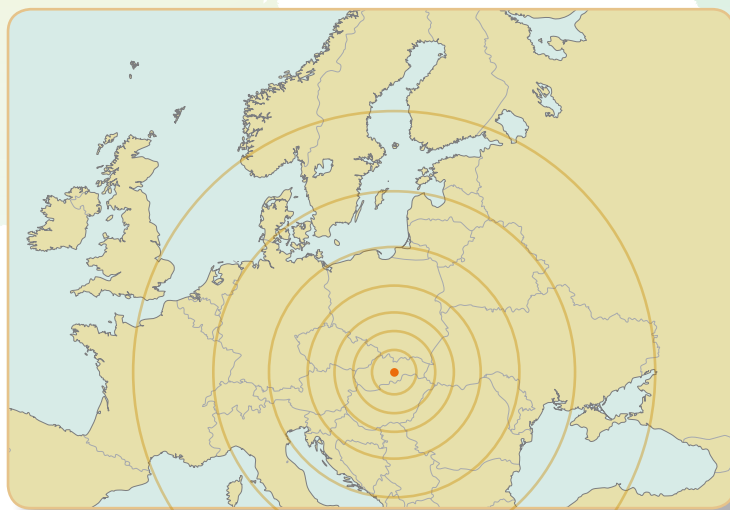

The Holon 29 Healing System

A Healing System is a powerful and comprehensive approach to healing that brings together the energy of three Help2Heal Europe projects. For Holon 29, located in Central Europe; these projects are the West Beskids in Poland, and Duna Ipoly and Bükk in Hungary.

By harnessing the collective energy of these projects, the Healing System actively contributes to the restoration and revitalization of nature throughout the entire holon.

The heart of the Healing System is located in Slovakia, south of the Tatra Mountains. It serves as the epicenter of energy, radiating healing vibrations across the entire region.

Balancing a Healing System

From the moment the three projects in Holon 29 had a vital and well balanced energy, the Healing System was initiated by Theo Hooijer and Sylvia Moes in December 2018. They continued balancing the Healing System thereafter. At first they experienced that the system was very weak and difficult to connect with, but at time progressed the true power of the Healing System of Holon 29 emerged: grand, radiant, with transformative energy and unconditional love for the whole.

According to Sylvia and Theo is balancing a Healing System a next and deep level of energetic experience in the overall Help2Heal Europe process. A wholehearted connection and the purest human intention are necessary for collaboration with energies on this extraordinary level.

Tap into the Healing System energy

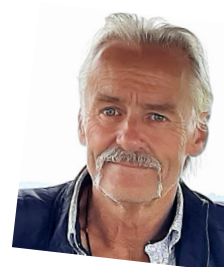

We believe that healing is not limited to a select few; it is a gift that should be accessible to all. That is why we invite and encourage everyone to connect with the energy of the Healing System. By tapping into this collective energy, individuals can contribute to the restoration and rejuvenation of nature in their holon.

Healing System workshops

To facilitate the learning and practice of this transformative healing process, the Help2Heal Europe Foundation organizes workshops. These workshops provide a nurturing space where participants can acquire the necessary knowledge and skills to harness the healing energy and direct it towards the natural world.
